

## ABSTRACT OF THE DISCLOSURE

A zipper tape (2) with the mating section (3) (the male strip (3a) and the female strip (3b)) formed thereon has a three-layered structure comprising the heat-insulating film (6) as an intermediate layer, the thermally fused film (7) thermally fused and bonded to one side of the heat-insulating film (6) of the bag (5), and the thermally fused film (8) for formation of a mating section bonded to another side of the bag (5). Letters, marks, or colors are printed on or given  
5 to the mating sections (102) and (104) on the base tapes (101) and (103) respectively.

**IN THE ABSTRACT:**

Please replace the abstract as originally filed with the abstract attached hereto on a separate sheet of paper and forming a part of this response. No new matter has been added.
